

The SERIES 600 and 700 is a range of high performing diaphragm valve, suitable for Dust collector applications, in particular for

reverse pulse jet filter cleaning of filter bags, cartridges, envelope filters, ceramic filters and sintered metal fibre filters. These valves,

due to their inlet port larger than the outlet port, create a Venturi effect by causing a high flow rate at the outlet. The inlet is provided with a square flange designed for the coupling with a counter flange (optional) and stub pipe which are welded directly to the tank. The outlet is equipped with a quick connection fitting for the blow tube. The valves are constructed in die-cast aluminium and have an anodised protection treatment which protect them from corrosive and environmental agents. Bolts and screws are in stainless steel. The 600 and 700 Series are available in the following versions:

- VNP, with integrated solenoid pilot
- VEM, with remote pneumatic connection.

| TYPE | Port Size Ø | | Ν° | Pressure Range (bar) | | Weight | 0." | v | - |
|--------|-------------|--------|--------|----------------------|-----|--------|------|-----|------|
| | IN | OUT | Diaph. | min. | max | Kg. | Coil | Κv | Cv |
| VNP608 | 2" | 11 | 1 | 0,5 | 7,5 | 0,55 | YES | 10 | 11,6 |
